## SOFTWARE ENGINEERING STUDENT

3rd-year Software Engineering student with a data-oriented background, experienced in SQL, Python, REST APIs, and backend systems. Interested in data engineering, data modeling, and analytics-focused architectures.

## EDUCATION

|                                                                                                                                                                                         |                    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| <b>Maltepe University – BSc in Software Engineering</b> <ul style="list-style-type: none"><li>GPA: 3.17</li><li>Merit Scholarship: 25%</li><li>Expected Graduation: June 2027</li></ul> | Oct 2023 - Present |
| <b>Dragos Uğur Anatolian High School</b> <ul style="list-style-type: none"><li>Valedictorian, Honors Diploma</li><li>GPA: 99.38 / 100</li><li>STEM-oriented curriculum</li></ul>        | 2019 - 2023        |

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                           |                               |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| <b>Student Assistant - Maltepe University</b> <ul style="list-style-type: none"><li>Supporting course preparation, basic administrative tasks and coordination within the department. Responsibilities will include assisting instructors, helping with documentation and contributing to academic operations as needed.</li></ul>                        | January 2026 - Present        |
| <b>Information Technologies Intern - Social Office</b> <ul style="list-style-type: none"><li>Completed hands-on training in Python and Excel for data-oriented tasks.</li><li>Designed an interactive Excel dashboard, implemented a Python command-line application and delivered technical design outputs using AutoCAD and Photoshop.</li></ul>        | August 2025 - September 2025  |
| <b>Architectural and Engineering Internship - Arch Of Sigma</b> <ul style="list-style-type: none"><li>Completed an architectural and engineering internship involving room modeling in SketchUp and 2D/3D room design in Rhinoceros 3D, alongside project management and product development practices.</li></ul>                                         | November 2025 - December 2025 |
| <b>Vice President – Google Developer Groups on Campus Maltepe</b> <ul style="list-style-type: none"><li>Managed end-to-end operations for community events, including planning, execution, and post-event evaluation.</li><li>Supervised social media, organization, and education teams, ensuring alignment, timelines, and quality standards.</li></ul> | 2025 - Present                |
| <b>Core Team Member - Anka Software Club</b> <ul style="list-style-type: none"><li>Designed and prepared social media visuals using Canva.</li><li>Contributed to managing the club’s official Instagram presence.</li><li>Assisted in the planning and coordination of the AI &amp; Technology Summit.</li></ul>                                         | 2024 - 2025                   |

## SKILLS

|                                                                                                                                                                                                                                                                                                                                 |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Languages:</b> <ul style="list-style-type: none"><li>Python, Java, C, SQL, HTML, CSS, JavaScript, Kotlin</li></ul>                                                                                                                                                                                                           |
| <b>Frameworks, Tools &amp; Platforms:</b> <ul style="list-style-type: none"><li>Flask, Android Studio, Git, GitHub, Postman, Figma, XAMPP, phpMyAdmin, PlantUML, Adobe Premiere Pro, Microsoft Office (Word, Excel, PowerPoint), Adobe Photoshop, VS Code, SketchUp, Rhinoceros 3D,</li></ul>                                   |
| <b>Databases:</b> <ul style="list-style-type: none"><li>PostgreSQL, MySQLi SQLite</li></ul>                                                                                                                                                                                                                                     |
| <b>Concepts &amp; Techniques:</b> <ul style="list-style-type: none"><li>Data Modeling &amp; Database Normalization · SQL Querying &amp; Aggregation · RESTful API Design · CRUD Operations · Object-Oriented Programming (OOP) · MVC Architecture · Data Structures &amp; Algorithms · Version Control · UML Diagrams</li></ul> |

## PROJECTS

|                                                                                                                                                                     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Virtual Debate Platform – Kotlin, Flask, MySQL</b> <ul style="list-style-type: none"><li>RESTful APIs · Rating &amp; ranking system · Data persistence</li></ul> |
| <b>Student Governance System – Flask, SQL</b> <ul style="list-style-type: none"><li>Election workflows · Database design · UML diagrams</li></ul>                   |
| <b>Graduate Thesis System (GTS) – SQL, Data Modeling</b> <ul style="list-style-type: none"><li>Normalized schema · CRUD logic · Academic data management</li></ul>  |
| <b>Virtual Debate Platform – Kotlin, Flask</b> <ul style="list-style-type: none"><li>REST APIs · Ranking logic · Backend data flow</li></ul>                        |

## CERTIFICATES

- CS50 – Introduction to Computer Science (Harvard, 2024)
- Generative AI with Python – Akbank Gençlik Akademisi (2025)
- Software Development Bootcamp – Coderspace (2025)
- Developer Career Summit – Coderspace (2025)
