SOFTWARE ENGINEERING STUDENT

3rd-year Software Engineering student with a data-oriented background, experienced in SQL, Python, REST APIs, and backend systems. Interested in data engineering, data modeling, and analytics-focused architectures.

EDUCATION

Maltepe University – BSc in Software Engineering - GPA: 3.06 - Merit Scholarship: 25% - Expected Graduation: June 2027	Oct 2023 - Present
Dragos Uğur Anatolian High School - Valedictorian, Honors Diploma - GPA: 99.38 / 100 - STEM-oriented curriculum	2019 - 2023

EXPERIENCE

Student Assistant - Maltepe University Starting as a student assistant, supporting course preparation, basic administrative tasks and coordination within the department. Responsibilities will include assisting instructors, helping with documentation and contributing to academic operations as needed.	
Information Technologies Intern - Social Office - Completed hands-on training in Python and Excel for data-oriented tasks. - Designed an interactive Excel dashboard, implemented a Python command-line application and delivered technical design outputs using AutoCAD and Photoshop.	August 2025 - September 2025
Architectural and Engineering Internship - Arch Of Sigma Completed an architectural and engineering internship involving room modeling in SketchUp and 2D/3D room design in Rhinoceros 3D, alongside project management and product development practices.	November 2025 - December 2025
Vice President – Google Developer Groups on Campus Maltepe - Managed end-to-end operations for community events, including planning, execution, and post-event evaluation. - Supervised social media, organization, and education teams, ensuring alignment, timelines, and quality standards.	2025 - Present
Core Team Member - Anka Software Club - Designed and prepared social media visuals using Canva. - Contributed to managing the club’s official Instagram presence. - Assisted in the planning and coordination of the AI & Technology Summit.	2024 - 2025

SKILLS

Languages: , Python, Java, C, SQL, HTML, CSS, JavaScript, Kotlin
Frameworks, Tools & Platforms: Flask, Android Studio, Git, GitHub, Postman, Figma, XAMPP, phpMyAdmin, PlantUML, Adobe Premiere Pro, Microsoft Office (Word, Excel, PowerPoint), Adobe Photoshop, VS Code, SketchUp, Rhinoceros 3D,
Databases: PostgreSQL, MySQLi SQLite
Concepts & Techniques: Data Modeling & Database Normalization · SQL Querying & Aggregation · RESTful API Design · CRUD Operations · Object-Oriented Programming (OOP) · MVC Architecture · Data Structures & Algorithms · Version Control · UML Diagrams

PROJECTS

Virtual Debate Platform – Kotlin, Flask, MySQL RESTful APIs · Rating & ranking system · Data persistence
Student Governance System – Flask, SQL Election workflows · Database design · UML diagrams
Graduate Thesis System (GTS) – SQL, Data Modeling Normalized schema · CRUD logic · Academic data management
Virtual Debate Platform – Kotlin, Flask REST APIs · Ranking logic · Backend data flow

CERTIFICATES

- CS50 – Introduction to Computer Science (Harvard, 2024)
- Generative AI with Python – Akbank Gençlik Akademisi (2025)
- Software Development Bootcamp – Coderspace (2025)
- Developer Career Summit – Coderspace (2025)
